

Karli Rice Chudeau, MA

Karli Rice Chudeau is a PhD candidate in the Animal Behavior Graduate Group at UC Davis. She focuses on conservation behavior, assessing animal welfare, and increasing behavioral competency in wildlife rehabilitation. Her current research examines how the use of behavioral management interventions, such as environmental enrichment, can improve cognitive development and reintroduction success with seals. Rice Chudeau is also a science communicator who enjoys training young professionals in science translation and communication in order to make sciences more accessible and relatable to wider audiences. More information can be found on her website: <https://www.karliricechudeau.com/>.
